

**Cheboygan County Road Commission**  
**Grant Township Local Road Ratings Report for 2018**

The goal of the Road Commission is to use Asset Management Strategies when planning projects for the roads under the jurisdiction of the Cheboygan County Road Commission. Asset management, as defined by Public Act 199 of 2007, is an “ongoing process of maintaining, upgrading and operating physical assets cost-effectively, based on a continuous physical inventory and condition assessment. Using asset management will allow the Road Commission - and Township to invest the available road funds in a manner that will provide the greatest return.

<b>PASER Road Rating System</b>
---------------------------------

All the local paved and gravel roads are rated each year using the PASER Road Rating system in the Township (seasonal roads are not included). PASER, or Pavement Surface Evaluation and Rating, is the rating system that is used in collecting data for RoadSoft. The roads are rated on a scale of 1 to 10 according to surface conditions of the pavement or a scale of 2 to 10 for gravel surfaces. The tables below show the rating and the suggested maintenance that would be required to preserve the road along with an estimated cost of repair.

**PASER Rating and Treatments for Paved Roads**

Road Rating	Recommended Repair	Estimated Cost per Mile
10	No maintenance necessary. New Road	\$ 0
9	No Maintenance necessary. Smooth Surface.	\$ 0
8	Minor Crack Sealing	\$ 600
7	General Crack Sealing and/or Minor Patching	\$ 3,200
6	Patching and Sealcoat	\$ 29,000
	Ultra-thin Asphalt Overlay	\$ 63,000
5	Asphalt Wedging	\$ 47,000
	Asphalt Wedging and Sealcoat	\$ 75,000
	Asphalt Wedging and Ultra-thin Asphalt Overlay	\$ 106,000
4	Asphalt Wedging and Overlay	\$ 142,000
3	Pulverize, gravel and pave	\$ 240,000
2	Reconstruction.	\$ 350,000
1	Reconstruction. Failed Road.	\$ 350,000

**PASER Rating and Treatments for Gravel Roads**

<b>Road Rating</b>	<b>Existing Condition / Recommended Repair</b>	<b>Estimated Cost per Mile</b>
10	No maintenance necessary. New Road	\$ 0
8	Good crown and drainage throughout. Adequate gravel for traffic. Maintain with grading and dust control.	\$ 500
6	Existing crown with drainage on 50% or more of roadway. Additional gravel needed in some areas along with ditching.	\$ 45,000
4	Little or no crown. Ditched on less than 50% of the road. Additional gravel needed on entire road along with ditching.	\$ 85,000
2	Failed road. Reconstruction.	\$ 250,000

## 2015 - 2017 PASER Ratings for Paved Local Roads

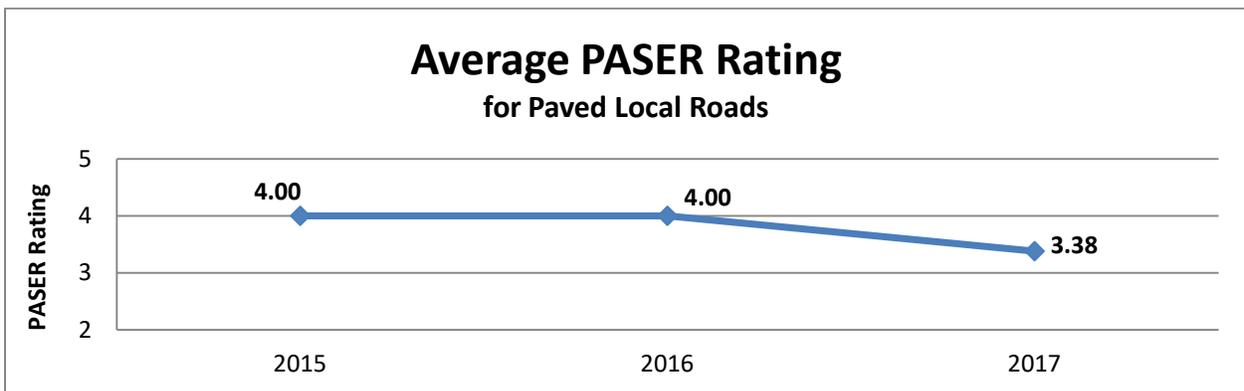

### Estimate Cost to Repair Local Paved Roads Based on 2017 PASER Ratings

Road Rating	Miles	Estimated Cost per Mile	Total Cost
10	0	\$ 0	\$ 0
9	0	\$ 0	\$ 0
8	0	\$ 600	\$ 0
7	0	\$ 3,200	\$ 0
6	0	\$ 29,000	\$ 0
5	0	\$ 47,000	\$ 0
4	0.49	\$ 142,000	\$ 69,580
3	0.80	\$ 240,000	\$ 192,000
2	0	\$ 350,000	\$ 0
1	0	\$ 350,000	\$ 0

**Total Cost in 2018 = \$ 261,580**

## Grant Township Gravel Local Road Ratings

### Current Road Ratings

PASER Rating	Road Name	Limits	Length (miles)
10			
8	Orchard Beach Road	Township Line to seasonal road.	1.12
6	Abbey Road	Black River Road to Viau Road.	1.60
	Bayou Drive	Township Line south to end of road.	0.12
	Cedar Trail	Doriva Beach Road to end of public road.	0.23
	Chamberlin Road	Ross Road to Twin Lakes Road.	1.00
	Cronan Road	Twin Lakes Road to page Road.	0.96
	Eisen Trail	Doriva Beach Road to Bluff Highway.	0.75
	Forsyth Road	South River Road to end of road.	0.43
	Gaynor Road	Zolner Road to Black River Road.	1.00
	Hanson Road	Owens Road to Chamberlin Road.	1.00
	Owens Road	Page Road then south to end of road.	2.48
	Page Road	Black River Road then east to end of road.	1.49
	Ross Road	Owens Road to Doriva Beach Road.	2.10
	Trudeau Road	Twin Lakes Road then north to end of road.	2.28
	Twin Lakes Road	Township Line to Black River Road.	1.99
	Viau Road	Abbey Road to end of road.	0.28
	Zolner Road	Bishop Road to Black River Road.	2.41
4	Archanbo Street	Black River Road to end of road.	0.16
	Bluffs Highway	Township Line then north to end of road.	0.30
	Eisen Trail	Bluff Highway to end of road.	0.21
	Godin Road	Krouse Road to end of loop.	0.80
	Gottschalk Drive	Twin Lakes Road then south to end of road.	0.17
	High Bluffs Trail	Doriva Beach Road to end of road.	0.24
	Krouse Road	Loons Nest Road to Twin Lakes Road.	1.42
	Lenz Road	South Siver Road to end of road.	0.39
	Moulder Drive	Twin Lakes Road to Twin Lakes Road.	0.30
	Naomi Street	Black River Road to Winfred Street.	0.03
	Smith Road	Twin Lakes Road then north to dead end.	0.82
	Twin Trail	Twin Lake Road north to end of road.	0.28
	Winfred Street	Zolner Road to Naomi Street.	0.23
	Zolner Road	Black River Road to end of road.	0.07
2	Krouse Road	Alpena State Road to Loons Nest Road.	0.78
	Un-Named Road	Krouse Road then west to end of road on south side of Section 35, T37N, R1E.	0.30

**Average PASER Rating for Gravel Local Roads 5.56**

# 2015 PASER Ratings for Gravel Local Roads

## Service Life of Treatments

Service life is the expected time that a treatment will last before needing complete reconstruction. In the table below, an expected service life for a particular treatment is listed. Before a treatment reaches the expected service life, preventative maintenance should be performed. Preventative maintenance will extend the expected service life of the pavement and treatment.

### Service Life of Treatments for Paved Roads

Road Rating	Recommended Repair	Expected Service Life (years)
8	Minor Crack Sealing	5
7	General Crack Sealing and/or Minor Patching	5
6	Patching and Sealcoat Ultra-thin Asphalt Overlay	7 7 – 10
5	Asphalt Wedging Asphalt Wedging and Sealcoat Asphalt Wedging and Ultra-thin Asphalt Overlay	7 7 – 10 10
4	Asphalt Wedging and Overlay	12 – 15
3	Pulverize, gravel and pave	15 – 25
2	Reconstruction.	25 - 30
1	Reconstruction. Failed Road.	25 - 30

For example, if a road has a PASER rating of 6, a treatment of a ultra-thin asphalt overlay is recommended (see the Table titled PASER Ratings and Treatment on page 1). The expected service life for an ultra-thin asphalt overlay is 7-10 years. Preventative maintenance in the form of crack sealing may be required after 2 years.

Expected service life may be shorter if the road is on poor soils that are not addressed as part of the treatment. If a project is selected that is not the recommended treatment, the service life listed in the table above will be shorter and preventative maintenance will need to be performed sooner.

Service Life for a gravel road is difficult to predict. Gravel road conditions can change rapidly based on weather, grading and traffic effects on the roads.
