Pickereel-Crooked Lakes Association Mission Statement

- 🪿 Promote and endorse projects to enhance water quality, including water levels, sanitary conditions, and fishing facilities.
- 🪿 Support and urge compliance with laws and regulations intended to maintain and protect water quality.
- 🪿 Oppose proposed developments or activities which could adversely affect the waters, shoreline and the environment in general.
- 🪿 Educate and inform all users of the lakes about the proper care and management of water resources.
- 🪿 Monitor water quality.
- 🪿 Provide information to members with water quality problems or questions.
- 🪿 Advocate for other improvements that are conducive to the use of the lakes for health and recreation.

Life on Beautiful Pickerel-Crooked Lakes

Pickerel and Crooked Lakes have historically provided a wonderful opportunity for fun and recreation as well as access to wilderness, swamps and wetlands on the Inland Waterway and sharing in our bountiful wildlife habitat.

We can enjoy fishing, boating, waterskiing and canoeing in our search for balance in our high stress lives. We can take a trip down the Inland Waterway and enjoy the meandering path between Crooked Lake and Lake Huron and all its wild beauty. We can also observe a wide variety of wildlife, birds and fish.

What is the PCLA?

The Pickerel-Crooked Lakes Association is a registered non-profit organization that supports measures which contribute to the healthy environment of these connected lakes. We work with governmental and environmental groups to promote and endorse projects to enhance water quality and deal with issues that can negatively impact this vital waterway.

PCLA guards our wetlands by working to reduce shoreline erosion. We also educate residents and visitors about what they can do to protect this irreplaceable natural resource. Pickerel and Crooked Lakes comprise a rich, beautiful habitat. We encourage you to keep it healthy for the next generation, while you enjoy it to the fullest.

PCLA Activities and Accomplishments

- Established educational kiosks at water access sites in the community.
- Regularly sponsor boating safety courses.
- Participate in local festivals and parades to raise awareness of water issues.
- Monitor waterways for detection of invasive species and water quality.
- Contribute to land acquisition projects for land protection and conservation.
- Participate in aquatic vegetation surveys.
- Partner with DNRE to protect and promote sport fishing.
- Work with other organizations and/or agencies on legislation to protect and maintain waterways.
