

# Emmet County Recycling

In the fall of 2010, Emmet County Recycling applied to the Community Foundation to build on the success of their recent campaign, *Recycle More, Sort Less* by offering public space recycling. “With over a million visitors to the region annually, one untapped potential for recycling and recovery has become clear: public space recycling,” read the application. With a \$5,000 grant, Emmet County Recycling will purchase 5-7 aesthetically pleasing, heavy duty, semi-permanent public space recycling receptacles to place in strategic spots throughout Petoskey’s Gaslight District. Partners in the project include the City of Petoskey, Petoskey Parks and Recreation Department, the Downtown Development Authority, and Emmet County Recycling. Downtown and Chamber business have

been very encouraging of the project – look for the receptacles in the coming months!

These vultures keep watch at the Emmet County Recycling Center on Pleasantview Road.
