Wojan Introduces Double-Hung Tilt-In Window Series

Charlevoix, Mich. (August 2014) – Wojan Window & Door, the Charlevoix, Mich.- based commercial window and door manufacturer, recently added a double-hung window to their commercial aluminum window line. The M1500 Series Double-Hung Tilt-In is a 3¼” frame custom built double-hung that carries a CW30 AAMA rating, and features versatile dual accessory channels and a pour and debridge polyurethane thermal break – thermal protection standard on all Wojan window and door products.

The addition of this double-hung opens the steadily growing company up to accommodating more kinds of projects; an ideal progression for a mid-size company such as Wojan.

The M1500 Series is the latest in a string of new product debuts for Wojan, including most recently the new 2125/2140 Series of Replacement Sliding Glass Doors and the architecturally-rated (AW) M-950 Series Horizontal Slider. Visit www.wojan.com for details on the entire commercial product line from Wojan Window & Door.
