## **Wojan Introduces AW-rated M950 Horizontal Slider**

Charlevoix, Mich. (November 2013) – Wojan Window & Door recently announced the new M-950 Series AW Rated Horizontal Slider. The 3¼” frame horizontal slider recently earned an AW40 rating from tests conducted at Architectural Testing, Inc. in Schofield, WI. Joining the M-950’s AW-rated Single-Hung and Fixed models, the slider features heavy-duty easy-glide tandem ball-bearing rollers, multi-fin weather stripping, ergonomic design pull rails, and dual accessory channels.

Introduced in 2010, Wojan’s M-950 Series has come to be relied upon for myriad projects from student housing to senior living facilities. In addition, many military facilities requiring anti-terrorism measures have installed Wojan’s M-950B Blast-Resistant windows, making the 3¼” frame model an essential line for Wojan. The versatility of the M-950 Series is accentuated by many advanced features, including a wider thermal break and dual accessory channels.

Improvements such as these have expanded Wojan’s capabilities; allowing them to produce windows for a larger range of applications.

*About Wojan Window & Door Corp.*
