

Quality Windows and Doors for All Seasons

New Blast-Resistant Aluminum Windows from Wojan

October 20, 2010

Wojan Window & Door is pleased to introduce a new series of blast-resistant aluminum windows – the M-950B Series. AW-rated with a 4¾” frame depth, the series is available as Single-Hung and Fixed models. Designed to meet Department of Defense (DoD) Unified Facilities Criteria (UFC) at conventional standoff, the M-950B meets anti-terrorism force protection (ATFP) UFC 4-010-01 and 02. The M-950B Series is an exciting addition to the Wojan line of commercial aluminum windows.

The M-950B provides protection for Explosive Weight I & II at conventional construction distances, are fully factory assembled, shop glazed and offer easy, cost-effective installation. Blast test certifications are available upon request.

With a 10-year limited warranty on its 1” sealed insulated glass (IGU), as well as five years on the window’s materials and workmanship (one year moving parts), Wojan offers one of the most competitive bundles of warranty coverage in the industry. Wojan's aluminum extrusion supplier uses Azo-Brader™ technology, which creates a mechanical lock in the polymer as part of its quality production process. This enhanced-design, pour and debridge thermal break carries a 10-year pass-through warranty.
