

Quality Windows and Doors for All Seasons

M-950 Series Earns Reader's Choice Award

February 4, 2011

Wojan Window & Door Corp. of Charlevoix recently earned a major industry award from USGlass® Magazine as having the "most significant commercial door or window product of 2010" with their new M-950 Series of Aluminum Windows. The M-950 Series is a line of architecturally-rated commercial aluminum windows with a 3¼" frame depth, a wider thermal break and a 1" insulated glass unit; characteristics that provide significantly improved energy efficiency.

Senior Engineer David Dewey and President Dennis Wojan, along with the Wojan engineering department worked for a year to ready this new product and the marketplace is responding with enthusiasm. M-950 Series windows have already been installed on several projects throughout the Midwest and Mid-Atlantic regions including an apartment complex in Waunakee, WI, a housing project in Mt. Clemens, MI, and military facilities at Ft. Belvoir in Virginia, Camp Lejeune in North Carolina and Ft. Benning in Georgia.

Even as the interest in the M-950 appears to be on the rise, the Wojan team has already completed other new projects for Wojan such as the M-950B Series; blast-resistant windows typically used on military bases, as well as a new line of Sliding Glass Doors. Next up for Wojan will be blast-resistant hurricane windows that can be installed in hurricane-prone regions of the country.

Since 1952 Wojan Window & Door Corp. has been providing quality aluminum windows and sliding glass doors for the U.S. marketplace from manufacturing facilities in Charlevoix and Coldwater, Michigan. Mr. Wojan, who's father Walter Wojan founded the company, is a lifelong resident of Charlevoix and has led Wojan Corp. since 1970. In addition to the award from USGlass® Magazine, Inc.® Magazine has recognized Wojan Corp. as one of the fastest growing private companies in America for four years in a row. Wojan is a member of AAMA (American Architectural Manufacturers Association), and is a registered provider with AIA/CES (American Institute of Architects Continuing Education System).
