

Quality Windows and Doors for All Seasons

Wojan Adds New 3¼" Horizontal Slider to M-950 Series

November 24, 2010

Wojan Window & Door has added new horizontal slider models to its M-950 Series of aluminum windows. With a 3 ¼" frame depth, the slider is performance rated CW50; and is available in end vent, single vent and center vent configurations.

"The launch of the M-950 brings to market a highly capable product, combining attractive structural and water attributes with very favorable thermal characteristics," said Vice President of Sales Rick Pagano.

Along with the window's enhanced-design thermal break, available high-performance glass packages help achieve impressive U-values.

The M-950 has a 10-year limited warranty on its 1" sealed insulated glass (IGU), as well as five years on the window's materials and workmanship (one year moving parts). "Wojan provides one of the most competitive bundles of warranty coverage in the industry," said Pagano. "For example, our standard 70% Kynar® finish meets or exceeds AAMA 2605 performance requirements, and we offer a 15-year limited warranty on it.

M-950 Horizontal Slider in Center Vent configuration

"We also offer a 10-year pass-through warranty on the pour and debrided thermal break," he said. "Our aluminum extrusion supplier uses Azo-Brader™ technology, which creates a mechanical lock in the polymer as part of its quality production process.

"This combination of design features and coverage puts Wojan's M-950 near the top of its category for quality and performance."

Standard finish offerings include bronze or white (AAMA 2603), bronze or white Kynar® (AAMA 2605), and clear or bronze anodized (AAMA 611) - custom colors are available with minimum order quantities.

The newly-developed M-950's were put through their paces at an independent certified lab, which tested them according to the latest standard, NAFS-08 (North American Fenestration Standard - AAMA/WDMA/CSA 101/I.S.2/A440-08) – confirming that the products meet or exceed requirements for air infiltration, water resistance, uniform structural load and other key performance factors.

Typical of the company's entire window product lineup, numerous installation systems are available, along with a variety of mulling and stacking options.

Founded in 1952, Wojan Window & Door Corp. manufactures quality aluminum windows and sliding glass doors for the U.S. marketplace from facilities in Charlevoix and Coldwater, Michigan. The diverse product line is rated for a variety of commercial and architectural applications. Wojan has been recognized four years in a row by Inc.® Magazine as one of the fastest growing private companies in America. Wojan is a member of AAMA (American Architectural Manufacturers Association), and is a registered provider with AIA/CES (American Institute of Architects Continuing Education System).
