ABOUT OUR SERVICE RATES

Each year, Cedarville Marine dedicates approximately twenty thousand dollars in technician training and recertification. Additionally, we continue to upgrade our equipment, tooling, fixtures, and facilities.

These expenses are a necessary component of conducting business, however you (our service client) realize a substantial benefit from our ongoing improvements. Constant training produces more capable technicians, and state-of-the-art equipment extends our technicians' capabilities. As a result, the service time for which you are invoiced is significantly reduced.

Be that as it may, trouble-shooting efforts on older equipment (where analyzers and current training are of little value) may become costly, and worse yet - potentially exceed the vehicle's value. It is our sincere interest and concern to point this possible scenario out to our clients. We thank you for your understanding, and respectfully appreciate your patronage.

THANK YOU!
